

Privacy Policy for RT4D

Effective Date: August 3, 2026

This Privacy Policy explains how Jon Halstead ("RT4D," "we," "us," or "our") collects, uses, stores, and discloses information when you access or use the RT4D application programming interface, GPT Action, scene-rendering services, and related features (collectively, the "Service").

By using the Service, you acknowledge the practices described in this Privacy Policy.

1. Information We Collect

We may collect the following categories of information:

Account Information

We may receive or maintain information associated with access to the Service, including:

- API credentials or authentication status;
- account identifiers;
- contact information voluntarily provided to us; and
- information needed to administer access to the Service.

API keys should not be submitted through prompts, messages, or other user-generated content.

Usage Information

When you use the Service, we may automatically collect information about your interactions with it, including:

- API requests and responses;
- request dates and times;
- endpoint usage;
- scene identifiers;
- prompts or scene descriptions submitted to the Service;
- rendering settings and scene updates;
- technical error information;
- device, browser, network, or IP address information made available through standard server logs; and
- information relating to generated previews, including file identifiers, integrity hashes, and rendering metadata.

User-Submitted Content

The Service may process prompts, scene descriptions, scene settings, rotations, projection values, and other information that you submit for the purpose of creating, updating, inspecting, or rendering a scene.

You are responsible for ensuring that you have the right to submit any information or content provided to the Service.

2. How We Use Information

We may use collected information to:

- provide, operate, and maintain the Service;
- authenticate requests and control access;
- create, update, inspect, and render scenes;
- generate and provide temporary preview URLs;
- maintain deterministic scene and rendering behavior;
- diagnose errors and respond to support requests;
- monitor performance, reliability, abuse, and security;
- enforce applicable terms, policies, and legal requirements;
- protect the Service, users, and third parties; and
- improve the functionality and quality of the Service.

We do not use API keys as prompt content or intentionally expose them through generated scene data or preview responses.

3. Legal Bases for Processing

Where applicable law requires a legal basis for processing personal information, we may process information:

- to provide the Service you requested;
- based on our legitimate interests in operating, securing, and improving the Service;
- to comply with legal obligations; or
- with your consent, where consent is required.

4. How We Share Information

We may disclose information in the following circumstances:

Service Providers

We may share information with third-party vendors that provide infrastructure, hosting, storage, security, logging, authentication, or other technical services. These providers may process information only as necessary to provide services to us and are subject to their own contractual and legal obligations.

Legal and Safety Requirements

We may disclose information when we reasonably believe disclosure is necessary to:

- comply with applicable law, regulation, legal process, or governmental request;
- enforce agreements or policies;
- investigate fraud, abuse, or security incidents;
- protect the rights, property, or safety of RT4D, users, or others; or
- establish, exercise, or defend legal claims.

Business Transfers

If the Service or its assets are involved in a merger, acquisition, financing, reorganization, sale, or transfer, information may be disclosed or transferred as part of that transaction, subject to applicable law.

We do not sell personal information for monetary consideration.

5. Cloud Processing and Generated Preview Files

The Service uses cloud-hosted infrastructure to process API requests and generate scene previews.

Generated previews may be stored temporarily and made available through time-limited, pre-signed URLs. Anyone who obtains a valid preview URL may be able to access the associated file until the URL expires.

You should not submit confidential, sensitive, regulated, or personally identifiable information in scene prompts unless you are authorized to do so and accept the associated processing risks.

6. Data Retention

We retain information only for as long as reasonably necessary to:

- provide and maintain the Service;
- preserve scene functionality and provenance;
- satisfy operational, security, and legal requirements;
- investigate misuse or technical incidents; and
- resolve disputes or enforce agreements.

Retention periods may vary depending on the type of information, the purpose for which it was collected, and applicable legal requirements.

Temporary preview URLs may expire before the underlying operational or rendering records are deleted.

7. Data Security

We use reasonable administrative, technical, and organizational safeguards designed to protect information against unauthorized access, loss, misuse, alteration, or disclosure.

These safeguards may include authentication controls, restricted API access, encrypted communications, credential management, cloud security controls, and integrity verification.

No electronic transmission, storage system, or security measure is completely secure. We cannot guarantee absolute security.

8. API Keys and Authentication Credentials

API keys and other credentials are confidential. Users must:

- store credentials securely;
- avoid including credentials in prompts, messages, source code, screenshots, or public repositories;
- promptly rotate credentials that may have been exposed; and
- avoid sharing credentials with unauthorized persons.

We may revoke or restrict credentials that are compromised, misused, or associated with suspicious activity.

9. Your Privacy Rights

Depending on your location, you may have rights regarding your personal information, including the right to:

- request access to personal information we maintain about you;
- request correction of inaccurate information;
- request deletion of certain information;
- object to or restrict certain processing;
- request a copy of certain information in a portable format; or
- withdraw consent where processing is based on consent.

These rights may be subject to legal exceptions and verification requirements.

To submit a privacy request, contact us using the email address listed below.

10. International Data Processing

The Service may process or store information in the United States or other countries where service providers operate.

Those countries may have data protection laws that differ from the laws of your jurisdiction. Where required, we will take reasonable steps to use appropriate safeguards for international data transfers.

11. Children's Privacy

The Service is not directed to children under 13, or to any higher minimum age required by applicable law.

We do not knowingly collect personal information from children through the Service. If you believe a child has provided personal information, contact us so that we can review and, where appropriate, delete it.

12. Third-Party Platforms

The Service may be accessed through third-party platforms, including ChatGPT and related GPT Action functionality.

Those platforms operate under their own privacy policies and terms. We are not responsible for the privacy practices, interfaces, or data-processing activities of third-party platforms.

Information submitted through a third-party platform may be processed by both that platform and RT4D.

13. Changes to This Privacy Policy

We may update this Privacy Policy periodically.

When we make changes, we will revise the effective date at the top of the policy. Material changes may also be communicated through the Service or through another appropriate notice.

Continued use of the Service after an updated policy becomes effective constitutes acknowledgment of the revised policy.

14. Contact Information

For questions, requests, or concerns regarding this Privacy Policy or the handling of personal information, contact:
